

EDUCATIONAL INSTITUTIONS

STS Sauter Training & Simulation SA is a Swiss company founded in 1996, dedicated to providing trainings in project management and developing innovative project management training tools. We offer a wide range of services, and we developed 4 categories of digital learning tools:

Assessment tools

e-Learning

SimulTrain®

Exam simulators

- Assessment tools which aim at evaluating objectively two key aspects of a project manager – knowledge and competences.
- Digital learning contents for different user profiles and knowledge levels. More than 250 lessons are grouped in various courses and cover the aspects of predictive and iterative project management approaches.
- SimulTrain® is a multi-media Project Management simulator used in training courses. Translated into more than 20 languages, SimulTrain® has contributed to training more than 200'000 project managers in over 50 countries.
- Online preparation tools (exam simulators) for certifications in project management, such as PMI®, IPMA, PRINCE2 exams.

We provide training solutions to companies, partners, universities, and individuals. Our training approaches are inspired by acknowledged concepts of adult learning and focus on the effective implementation and deployment of project management.

GLOBAL OUTREACH

STS has established good foundations with a great number **academic institutions worldwide** who deploy our digital tools in their project management classes with great satisfaction.

ACADEMIC INSTITUTIONS WHO TRUST STS

International and Swiss higher training institutions and universities in more than 20 countries have been using STS training tools in their courses for over 25 years.

THE LECTURER HAS AN ACTIVE ROLE

e-Learning: Students who learn the theory in self-study at the beginning of a cursus, allow a common level of knowledge early on. And the students are accompanied by a tutor.

Tutor: During this phase, the trainer can accompany and motivate the students, reply to their questions, and correct their self-replies within the learning system. STS provides every trainer using our e-Learning tools with a free coach/tutor access so that he/she can be there for students. After this first, self-learning phase, the trainees have a sound knowledge of project management what leads to more practical and applied teaching (case studies, serious games, hands-on exercises etc.) during instructor-led sessions.

e-Learning licenses are valid for 1 year.

SimulTrain® is a multi-media Project Management serious game which allows the trainees to experience – within a few hours – typical situations and challenges encountered in most projects. Each team of 3-4 participants runs, in the role of its Project Manager, a midsize project in an accelerated mode. Various situations arise during the simulation, which require

fast decision-making. However, decisions must take into account all the project parameters, i.e. cost, schedule, quality, but also the human factors. SimulTrain can be played in a classroom or virtually.

The trainer has an active role, he explains the simulation to students, monitors the group sessions, intervenes as the project sponsor and does debriefing sessions. STS offers free online SimulTrain Train-the-Trainer sessions. For dates check out our [website](#). Afterwards trainers can request a free password to experience SimulTrain in detail, as well as a personal Trainer Desk account for managing their sessions. One SimulTrain password is valid for one unique full simulation within 1 year.

PRICING FOR EDUCATIONAL INSTITUTIONS

STS supports education and is pleased to grant a special academic price for state schools and state universities. This price is granted on the twofold condition that the students must 1) be registered in initial (or vocational) training, for at least one year and that 2) the budget of the school must be controlled by the state. This price does not apply to any continuing (or executive) educational training.

STS has several price lists according to geographical region and currency.

Volume rebates may apply as of 11 licences in one order.

ORDERS

Schools and universities can place their orders by email to office@sts.ch or on our Partner Service Desk and specify:

- Exact Invoice address
- If required by the institution's purchasing department, a purchase order number.
- Quantity and product
- A tutor (e-learning) or TrainerDesk (SimulTrain) access for the trainer if required

STS will reply to email within 48 hours (2 Swiss working days) and send:

- The licenses / access codes ordered
- The invoice is payable within 30 days by bank transfer or PayPal.
